

# SUNFLOWER HERBICIDE

## PREMIER KOCHIA AND GRASS CONTROL IN SUNFLOWER

Spartan® Elite herbicide is a double mode of action on tough broadleaf weeds such as kochia and pigweeds, with excellent residual control. Spartan Elite herbicide has the added benefit of controlling several annual grass species such as foxtails and barnyardgrass. Spartan Elite herbicide starts off the season clean from both grass and broadleaf weeds for higher yields at harvest. Spartan Elite herbicide is ideal for no-till sunflower farming as incorporation is not needed.

### CONTROL

- Kochia
- Waterhemp
- Pigweeds
- Lambsquarters
- Eastern black nightshade
- Russian thistle
- Witchgrass
- Foxtails
- Barnyardgrass

Spartan Elite herbicide left, untreated right

- Effective residual control of broadleaf weeds
- Solution for kochia PLUS grasses
- Non ALS multiple modes of action
- Excellent control of foxtails and barnyardgrass
- No incorporation needed
- Double mode of action on pigweeds
